Licensing & Software Maintenance Service Information • 2024

Licensing Options

Individual: Individual licenses are intended for use by a single named user. The products can be activated on up to four different computers, provided that the products are only accessible to and used by that single named user. A named user may not use a program on more than two computers simultaneously.

Designated Computer: Designated Computer licenses are intended for use on a single, designated computer, provided the products are operated from that computer's console by one licensed user at any given time.

Network Named User: Network Named User licenses are intended for use by a specified number of designated named users to run the product on any computer that is connected to a single network license manager. It is the responsibility of the Licensee to maintain a list of specific user names. This license option requires a minimum of two named users.

Concurrent: Concurrent licenses are intended for use by a specified number of concurrent users to run the product on any computer that is connected to a single network license manager.

License Term

Annual and Short-Term licenses provide the right to use the software for a fixed duration, and MathWorks Software Maintenance Service is included in the license fee. To ensure uninterrupted service, you may renew your license prior to the conclusion of the license term. Otherwise, the license and Software Maintenance Service will expire at the end of the term period.

Perpetual licenses provide the right to use the software indefinitely, and the first year of MathWorks Software Maintenance Service is included in the initial purchase price. After the initial 12 month period, an annual fee is required to renew your Software Maintenance Service.

MathWorks Software Maintenance Service

The first year of Software Maintenance Service is included with new product licenses. You can continue uninterrupted service in subsequent years by renewing your subscription annually.

MathWorks Software Maintenance Service includes:

- The latest updates to your MATLAB and Simulink products with releases twice a year
- Worldwide technical support from specialized engineers
- Online offerings such as MATLAB Mobile, MATLAB Online, and MATLAB Drive

Note:

- An active subscription is required to purchase add-on products.
- If your subscription lapses, renewal at a later date will incur fees for the forward service period, any applicable back maintenance fees for the lapsed period, and a reinstatement fee of 25% of the annual cost of Software Maintenance Service.
- For more information, see <u>mathworks</u>. <u>com/services/maintenance</u>

Ineligible Programs

See Product Requirements to determine whether each program is eligible for use with MATLAB Compiler, Simulink Compiler, Parallel Computing Toolbox and MATLAB Parallel Server.

Additional Fees

The fees for the license are determined based upon the country where all licensed user(s) are principally located. Additional fees may apply to a transfer of the license, or the principal location of any licensed user, to another country.
